

1st **1-Meter USB4™ Cable**
in the World

CERTIFIED
USB 40™
Gbps

Description

With the USB4 technology, BizLink's USB4 Gen 3 cable can achieve speeds of up to 40Gbps via two-lane operation, which is twice the data transfer speed of current USB 3.2 cables. The USB4 Gen 3 cable is backward compatible with existing USB 3.2, USB 2.0, and Thunderbolt™ 3 hosts and devices. It offers simultaneous data and multi-protocol transmissions. In addition to higher transfer speeds, the cable supports the PD 3.0 E-marker solution with 20V/5A power delivery. This allows for carrying electricity to high power devices and better management of power. BizLink provides the premium and advanced USB4 high-speed connectivity solutions to fulfill customers' requirements. The premium USB4 Gen 3 cable features with a twist-pair structure and the advanced version has a robust coaxial cable structure.
